

Bookmarks - Vormerkliste

Synopsis

The module "Vormerkliste" shows all publications that have previously been bookmarked by the user. Each user has a personal list of bookmarks that is not visible to other users of the company. Publications that are no longer of interest to the user can easily be deleted from the bookmark list.

Please note that projects that have already been closed will automatically be moved to "Archiv" (archive) and a participation is no longer possible.

Favourites

All notices from your favourites are listed below. At this point you can move on to the notices or delete them from your favourites.

Your favourites
