

# Publications - Bekanntmachungen

## Synopsis

This module enables the user to search for public tenders published on the "Vergabemarktplatz" platform. With the help of keywords and a large variety of filters (e.g. by public procurement laws, type of publication, etc.) the user will find those publications corresponding to his companies interests. Fitting publications can easily be bookmarked, for example if the user first wants to get a broad overview before examining which of these are most suitable at a later stage.

If a project space has been set up for a certain tender by the public authority, this project space can be accessed by clicking the correspondant button in the action menu. Access to a project space is subject to the approval by the public authority ("Freischaltungsantrag"). The project space serves as a communication and transaction platform for both the public authority and the participating companies. This includes the possibility to download tender files, communicate with the tendering authority and submitting electronic offers (if applicable).

Hier werden noch einmal die wichtigsten Informationen zur Freischaltung angezeigt. Bitte beachten Sie die für Sie entstehenden Kosten.

Bitte berücksichtigen Sie, dass Vergabestellen, die einzig Ihre Bekanntmachung auf dem Vergabemarktplatz einstellen (ohne Vergabeunterlagen) in der Regel keine Freischaltung vornehmen. Ob die Möglichkeit der digitalen Ansicht sowie Anforderung der Vergabeunterlagen besteht, sehen Sie in der jeweiligen Bekanntmachung.
