
Administration - Verwaltung

The administration section ("Verwaltungsbereich") offers a variety of options to help companies and their users to get the most out of the "Vergabmarktplatz." In addition to administrative possibilities as adding new users or defining the companies' profile, users can set personal search profiles and use the automatic notification service to find interesting and fitting publications on the platform.

While the user administration and the editing of company data is only available to users with administrative rights, modules like search profiles ("Suchprofile") and notification services ("Benachrichtigungsdienst") are available for all users of the company's account.
